

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

PREVALENCE OF DISEASE.

No health department, State or local, can effectively prevent or control disease without knowledge of when, where, and under what conditions cases are occurring.

UNITED STATES.

RECIPROCAL NOTIFICATION.

Minnesota.

Cases of communicable diseases referred during April, 1916, to other State or provincial health departments by Dr. H. M. Bracken, collaborating epidemiologist for the State of Minnesota.

Disease and locality of notification.	Referred to health authority of.	Why referred.
Diphtheria: Seeley Township, Faribault County.	Chicago, Cook County, Ill.....	Child brought from Home of the Friendless, Chicago, introduced diphtheria in Minnesota home.
Measles: Albert Lea, Freeborn County..	Mason City, Cerro Gordo County, Iowa.	Children visiting from Iowa infected children in Minnesota.
Scarlet fever: Minneapolis health department, Hennepin County.	Farm of J. R., between New Richmond and Somerset, St. Croix County, Wis.	2 individuals exposed to scarlet fever in Minneapolis. Left for Wisconsin.
Tuberculosis: Mayo Clinic, Rochester, Olmsted County.	Manchester, Delaware County, Iowa (2 cases); Carroll, Carroll County, Iowa; Osage, Mitchell County, Iowa; Jamaica, Guthrie County, Iowa; Sioux Rapids, Buena Vista County, Iowa; Muscatine, Muscatine County, Iowa; Webster City, Hamilton County, Iowa; Minneola, Clark County, Kans.; Springfield, Greene County, Mo.; Sheridan, Worth County, Mo.; Grand Forks, Grand Forks County, N. Dak.; Wolcott, Richland County, N. Dak.; Turtle Lake, McLean County, N. Dak.; Dazey, Barnes County, N. Dak.; Mound City route No. 1, Campbell County, S. Dak.; Willow Lake, Clark County, S. Dak.; Egan, Moody County, S. Dak.; Sparta, Monroe County, Wis.; Gillette, Campbell County, Wyo.; Cordova, Alaska; Dana, Saskatchewan, Canada; Manna, Saskatchewan, Canada.	7 advanced, 3 moderately advanced, 2 incipient, 1 arrested, and 2 apparently cured cases left Mayo Clinic for homes; 4 advanced and 4 moderately advanced cases left Mayo Clinic for homes.
Typhoid fever: Minneapolis City Hospital, Hennepin County.	Farm of C. M., 2 miles northeast of Bucyrus, Adams County, N. Dak.	Patient worked for several weeks previous to first symptoms on farm in North Dakota.

LEPROSY.**Hawaii.**

During the month of March, 1916, 14 cases of leprosy were notified in the Territory of Hawaii.

Louisiana—Lake End.

During the month of April, 1916, 1 case of leprosy was notified at Lake End, La., in the person of R. K., a negro woman about 60 years old.

Massachusetts—Boston.

During the month of April, 1916, a case of leprosy in the person of H. S., age 40, native of Harpet, Turkey, came to the United States two and one-half years ago and is isolated at the Massachusetts leper station on Penikese Island.

New York—New York City.

During the week ended May 6, 1916, 1 case of leprosy and 1 death from the same disease were reported in New York, N. Y.

MALARIA.**State Reports for April, 1916.**

During the month of April, 1916, cases of malaria were notified in States as follows: Louisiana 16, Maryland 1, Massachusetts 4, New Jersey 5, South Carolina 18.

City Report for Week Ended May 6, 1916.

During the week ended May 6, 1916, 1 case of malaria was notified in Jersey City, N. J.

MEASLES.**Washington—Seattle.**

Surgeon Lloyd reported that during the week ended May 6, 1916, 281 cases of measles, with 1 death, were notified in Seattle, Wash., making a total of 2,110 cases, with 5 deaths, reported since the beginning of the outbreak February 15, 1916.

See also Diphtheria, measles, scarlet fever, and tuberculosis, page 1322.

PELLAGRA.**State Reports for April, 1916.**

During the month of April, 1916, cases of pellagra were notified in States as follows: Louisiana 33, Maryland 1, Massachusetts 3, South Carolina 19.

City Reports for Week Ended May 6, 1916.

During the week ended May 6, 1916, poliomyelitis was reported by cities as follows: Chicago, Ill., 1 death; Lowell, Mass., 1 case; New York, N. Y., 1 case; Philadelphia, Pa., 1 death.

RABIES.**Utah—Rabies in Animals.**

Dr. T. B. Beatty, secretary of the State Board of Health of Utah, reported by telegraph May 22, 1916, that since May 8 tests for rabies in animals proved to be positive in 8 coyotes, 1 cow, and 1 deer.

ROCKY MOUNTAIN SPOTTED FEVER.**Washington—Dayton.**

During the month of April, 1916, one case of Rocky Mountain spotted fever was reported at Dayton, Columbia County, Wash.

SCARLET FEVER.**Mississippi—Tate County.**

Collaborating Epidemiologist Stingily reported by telegraph May 23, 1916, that 24 cases of scarlet fever had been notified in Tate County, Miss.

See also Diphtheria, measles, scarlet fever, and tuberculosis, page 1322.

SMALLPOX.**Idaho—Elk River.**

Dr. Ralph Falk, secretary of the Idaho State Board of Health, reported by telegraph May 22, 1916, that 3 cases of smallpox had been notified at Elk River, Idaho.

SMALLPOX—Continued.**Maryland—Dorchester County.**

Collaborating Epidemiologist Fulton reported by telegraph that on May 22, 1916, 1 case of smallpox was notified at Grapo, Dorchester County, Md.

Minnesota.

Collaborating Epidemiologist Bracken reported by telegraph that during the week ended May 20, 1916, several new foci of smallpox infection were reported in Minnesota, cases of the disease having been notified as follows: Anoka County, Bethel, 1; Blue Earth County, Danville Township, 4; Freeborn County, Carleton Township, 1; Faribault County, Minnesota Lake, 1; Norman County, Strand Township, 3; Olmsted County, Eyota, 1.

Porto Rico.

Surg. King reported that during the week ended May 19, 1916, cases of smallpox were notified in Porto Rico as follows: Barros, 3 cases; Bayamon, 1 case; Caguas, 1; Carolina, 1; Catano, 1; Fajardo, 3; Gurabo, 1; Juncos, 5; Mayaguez, 1; Rio Piedras, 2; San Juan, 28; San Lorenzo, 2; Trujillo Alto, 23 cases, with 2 deaths; Utuado, 3; Vieques, 1.

Texas—Galveston.

Surg. Bahrenburg reported that on May 20, 1916, a case of smallpox was notified in Galveston, Tex., making a total of 19 cases of the disease reported at that place since January 1, 1916.
